🔗 github.com/MohammedSaiful 📍 South Banasree, Khilgaon, Dhaka

Computer Science student with a focus on building scalable web applications using C#, ASP.NET Core, ASP.NET (MVC), ASP.NET (Web Api) architecture. Experienced in building RESTful applications following n-tier architecture and SOLID principles. Solved 65+ problems on Codeforces and 50+ LightOJ. Also familiar with machine learning and computer vision through hands-on projects. Seeking to translate these technical capabilities into actionable business insights.

EDUCATION

Bachelor of Science in Computer Science Engineering Sep 2022 - Present
American International University - Dhaka, Bangladesh (AIUB)

CGPA: 3.85/4.00

Relevant Course:

- Programming with .Net, Machine Learning, Data Science, Computer Vision & Pattern

Higher Secondary Passing Year: 2022

Sabujbagh Government College Dhaka, Bangladesh

GPA: 5.00/5.00

TECHNICAL SKILLS

- **Front-End:** HTML, CSS, Bootstrap, JavaScript, Basic Angular
- **Back-End & Frameworks:** ASP.NET core MVC, ASP.NET core Web Api, Tensorflow, Entity Framework, AutoMapper, RESTful APIs, SOLID principles, 3-Tier Architecture
- **Database:** MSSQL
- **Programming Languages :** C#, Python, C++
- **Tools :** Git, GitHub, Visual Studio, VS Code, Postman, Google Colab

PROJECTS

Inventory Management System - Github [🔗](#) 2025

ASP.NET Web API, MSSQL, Entity Framework, AutoMapper, AngularJS 1.6, HTML, CSS

- Implemented 3-tier (DAL, BLL, Web API) architecture following SOLID principles. Implemented a secure JWT authentication system and Refresh Tokens mechanism and Role-Based Access Control (RBAC), Token-based authentication with expiration and logout invalidation.

E-Commerce-Website - Github [🔗](#) 2025

ASP.NET MVC, MSSQL, Entity Framework, AutoMapper, Bootstrap

- Built an ASP.NET MVC application where customer can order product, see orders and order status and designed admin dashboard to manage, confirm, and process customer orders. Track order statuses from Pending to Delivered.

Ticket Booking Api - Github

2026

ASP.NET Core Web API, MSSQL, Entity Framework, AutoMapper

- Designed the backend using N-Tier architecture separating API, Business Logic, Data Access layers. Applied SOLID principles and used Entity Framework Core as the ORM for database interaction
- Implemented JWT authentication with refresh token support to provide secure and efficient user session management. Added Role-Based Access Control (RBAC) so that different users have controlled access to specific API endpoints.

WhatsApp AI Bot - Github

2026

FastAPI, LangChain, Groq LLM, Twilio API

- Developed a WhatsApp AI chatbot that automatically receives and responds to user messages using the Groq LLM (Llama 3.3 70B) model. The bot processes incoming WhatsApp messages and generates intelligent responses in real time.

Real-time Face Identification using CNN

2025

Python, OpenCV, and TensorFlow/Keras

- Real-time face Identification system built using Python, OpenCV, and TensorFlow/Keras. It detects faces from a webcam feed, recognizes individuals using a trained deep learning model.

ACHIEVEMENTS

- **Dean's List Honors X4- AIUB**

AIUB Dean's Award for Academic Excellence(Fall 22-23, Spring 23-24, Fall 23-24, Spring24-25)
